EGG IN VINEGAR EXPERIMENT

Have you ever seen a naked egg? Can an egg bounce? Learn how to make a naked and bouncy egg with this cool egg in vinegar experiment.

Things You Need To Make A Bouncy Egg

- 3 Raw eggs
- Vinegar
- Red, blue and green food coloring
- 3 mason jars or any clear, glass jar

Steps To Make A Naked Egg

- **Step 1:** Fill up the three jars with vinegar. Put 2 drops of red food coloring in the first jar, 2 drops of blue food coloring to the second jar and 2 drops of green food coloring to the third jar. Cover and shake the jar to ensure the food color is completely mixed.
- **Step 2:** Carefully, place an egg in each of the 3 jars. After some time, you'll notice bubbles forming on the eggshell.
- **Step 3:** After 2 days, remove the eggs from the colored vinegar solution. It might have a thin layer of brown scum on it, just rinse it off under cold water
- **Step 4:** Drain the old vinegar, clean the jar and refill it with vinegar. Place the egg back in the jar and leave it undisturbed for 1 week.
- **Step 5:** After 7 days, drain the jar and rinse the egg under cold water. You'll notice that the hard eggshell is gone and you're left with a naked, bouncy and rubbery egg.

HOW TO MAKE A VOLCANO FOR KIDS

Want to see a volcano erupt right in front you? Then learn how to make a volcano at home with this fun science experiment.

Things You Need To Make A Volcano

- 100 ml of warm water
- 10 ml of dish soap
- 400 ml of white vinegar
- Empty 2-litre soda bottle
- 2 drops of red food coloring
- Baking soda slurry (½ cup baking soda and ½ cup water)

Steps To Make Your Homemade Volcano

- **Step 1:** Mix the dish soap, water, white vinegar, and food coloring and pour it into the empty soda bottle.
- **Step 2:** Make a baking soda slurry with ½ cup baking soda and ½ cup water. Mix it thoroughly with a spoon, until it's completely dissolved.
- **Step 3:** Now, it's eruption time! Quickly, but carefully pour this slurry into the bottle and step back. Now, watch the volcano erupt and spill out red lava!

LAVA LAMP EXPERIMENT

Learn how to make a lava lamp at home with this fun lava lamp experiment.

Things You Need To Make Your Own Lava Lamp

- Water
- Vegetable oil
- Orange food coloring (or any food coloring of your choice)
- 2 clear glass tumblers or jars
- Alka Seltzer tablets, and
- A small cup

Steps To Make A Homemade Lava Lamp

- **Step 1:** Add ½ cup of water to the glass jar or tumbler. Add some orange food coloring to the glass of water and mix with a spoon till you have an orange liquid.
- **Step 2:** Break the Alka-Seltzer tablets into two or three pieces and place them in a small cup.
- **Step 3:** Fill the second glass tumbler or jar with vegetable oil till the glass is 3/4 full. Now, pour the colored water into this container with the oil until the container is almost full. But be sure to leave at least 1-2 inches of space at the top, so that it doesn't overflow.
- **Step 4:** Add the Alka Seltzer tablet to this mixture of colored water and vegetable oil. You'll notice that orange-colored bubbles float up and down in the jar like a lava lamp!

RAINBOW IN A JAR

Rainbows are such magical things; wouldn't it be wonderful if you could one of your own? This amazing science experiment will help you make yourown rainbow in a jar.

Things You Need To Make A Rainbow In A Jar

- A clear, tall glass jar
- 1/4 cup Honey, mixed with 1 drop red food coloring and 1 drop blue food coloring to make it purple.
- 1/4 cup green Dish Soap
- 1/4 cup Water, mixed with 1 drop of blue food coloring
- 1/4 cup Olive Oil
- 1/4 cup Rubbing Alcohol, mixed with 1 drop of red food coloring

Steps To Make Your Own Rainbow In A Jar

- **Step 1:** Pour the ¼ cup of purple honey into the tall glass jar.
- **Step 2:** Then, measure and pour 1⁄4 cup of green dish soap into the tall glass jar, over the purple honey.
- **Step 3:** Now, tilt the tall glass jar slightly and carefully pour the blue water into the jar, ensure that the water runs down the side of the jar slowly.
- **Step 4:** Wait for a few minutes and then pour 1⁄4 cup of olive oil into the tall glass jar. Tilt the jar slightly and pour the liquid slowly so that it runs down the side of the jar. This ensures that the colors don't mix and ruin the rainbow.
- **Step 4:** Finally, pour the 1⁄4 cup of red rubbing alcohol carefully into the tall glass jar. And voila! Your beautiful rainbow in a jar is ready!
