Job description

We are looking for a React Native Frontend Engineer to build and maintain mobile applications. You will be working with the latest technology, and have the chance to advance and grow your career.

You will be collaborating with our Osmo web/mobile team based in France, India, and the US to develop a lot of impactful and challenging features.

We are looking for smart people with excellent coding skills and a can-do attitude. Candidates should be eager to learn, flexible to pivot when needed, savvy enough to thrive in a dynamic environment, and should possess a growth mindset.

Your mission in the team:

- Being a maker in one of our mobile app teams
- Implementing high-quality user-friendly features
- Develop high-quality Javascript (ES6) code for our React Native applications (iOS/Android).
- Optimize application for maximum speed and compatibility.
- Pay close attention to details and be able to follow mockups exactly – pixel perfect.
- Coordinate with backend engineers to establish JSON-based APIs.
- Making recommendations to address UI/UX issues.
- Provide assistance to QA to ensure the product is properly tested and QA'd.

Who are you?

- You have several experiences with React Native, TypeScript, ES6, CSS3.
- You have some experience with the native environments (XCode, Android Studio, Cocoapods, Gradle...).
- You have experience with at least one state management library (Redux, React-Query, Recoil...)
- You have a good understanding of data structures, data flow, Ajax, and CRUD.
- You have experience with version control tools (Git), NPM...
- You have a good eye for detail and a passion for beautiful products that provide high-quality user experiences.
- You are able to speak and write good English.

What do we expect from you?

- You will own, estimate, and complete complex projects.
- You will own the technical aspects of large features or parts of the codebase.
- You will complete your work timely and with high quality.
- Help to find alternative solutions, conduct root cause analysis.

Recruitment Process

- Interview with the team lead
- Technical test
- Technical interview
- Team-fit interview

Application

Congrats, you've read all the way! To apply, please send your resume to erwan@playosmo.com.
